

OPRMT™ Standard Change Request

Controlled template for requesting changes to the OPRMT™ Framework Standard, definitions, component rules, governance model, validation logic, and official documentation.

Document Type	GitHub Issue Template
Template Name	Standard Change Request
Repository	OPRMT™ Framework Repository
Owner	Michael W. Fleming
Version	v1.0.0
Status	Active Template
Recommended Path	.github/ISSUE_TEMPLATE/STANDARD_CHANGE_REQUEST.md

GitHub Issue Template Front Matter

Use this YAML front matter at the top of the template file.

```
---
name: "Standard Change Request"
about: "Request a controlled change to the OPRMT™ Framework Standard, definitions, component rules, governance model, validation logic, or official documentation."
title: "[STANDARD CHANGE]: "
labels: ["standard-change", "needs-review", "governance"]
assignees: ""
---
```

1. Change Request Summary

Provide a clear summary of the requested change.

```
Example:
Request to clarify the official definition of the Parameters component in the OPRMT™ Framework Standard.
```

2. Type of Standard Change

- Definition clarification
- Framework component update
- Documentation correction
- Specification expansion
- Terminology update
- Versioning rule update
- Governance rule update
- Prompt compliance rule update

DOAS™ scoring alignment update

Certification content alignment

Deprecation request

4. Current Standard Language

Paste the current wording, section, definition, or rule that should be changed.

Current language:

File path:

Example:

/standard/OPRMT-Framework-Standard-v1.0.md

Section:

5. Proposed Standard Language

Provide the proposed replacement language or new standard language.

Proposed language:

6. Reason for Change

Explain why the change is needed. Consider whether the current standard is unclear, incomplete, outdated, inconsistent, difficult to implement, misaligned with OPRMT™ structure, misaligned with PCE validation, misaligned with DOAS™ scoring, or creating repository confusion.

Reason for change:

7. Problem the Change Solves

Describe the specific problem this change is intended to solve.

Example:

The current Parameters definition does not clearly separate user-provided inputs from operating constraints, which may cause inconsistent prompt construction.

8. Expected Impact

Critical - affects core framework interpretation or compliance

High - affects major documentation, validation, or implementation

Medium - improves clarity or consistency

Low - minor wording, formatting, or documentation improvement

Expected impact:

9. Backward Compatibility

Will this change affect existing documents, prompts, templates, products, or certification materials?

Yes

No

Unsure

Backward compatibility notes:

10. Required File Updates

List all files that may need to be updated if this change is accepted.

/standard/OPRMT-Framework-Standard-v1.0.md
/framework/parameters/OPRMT-Parameters-Spec-v1.0.md
/docs/glossary.md
/docs/index.md

Other

12. Compliance Review

Does this change preserve the official OPRMT™ structure?

O — Objective
P — Parameters
R — Results
M — Method
T — Tools

Yes

No

Unsure

Does this change alter the meaning of any OPRMT™ component?

Yes

No

Unsure

Compliance concern:

13. Versioning Recommendation

Patch update - typo, link, formatting, or minor wording correction

Minor update - clarification or expanded guidance without changing core meaning

Major update - structural change, definition change, or compatibility-impacting update

Unsure

Recommended version change:

Example:

v1.0.0 v1.1.0

Reason:

Versioning reason:

14. Evidence or Supporting Notes

Provide supporting rationale, examples, references, screenshots, user reports, or implementation notes.

Supporting evidence:

15. Risk Assessment

May create confusion with existing documents

May require multiple file updates

May require certification material updates

May affect prompt template compatibility

May affect PCE validation logic

May affect DOAS™ scoring logic

May require license or usage policy review

Minimal risk

Unsure

Risk notes:

16. Implementation Plan

Describe how this change should be implemented if approved.

Example:

1. Update the affected standard file.
2. Update the related component README.
3. Update the glossary.
4. Add the change to CHANGELOG.md.
5. Include the change in the next release notes.

17. Approval Requirements

This section is for maintainers.

Repository Specialist review

Framework Owner review

Documentation review

PCE alignment review

DOAS™ alignment review

Legal or licensing review

Certification review

Not required

18. Contributor Confirmation

By submitting this standard change request, I confirm that:

I have identified the affected file, section, or standard area.

I have explained the reason for the requested change.

I understand that OPRMT™ terminology and framework structure are controlled.

I understand that proposed changes require review before adoption.

I understand this request does not grant permission to modify, reuse, commercialize, or redistribute OPRMT™ intellectual property outside the repository license and usage policy.
